

**Introduction: The New Economics of Knowledge ..... 1**

    A Story of Failure ..... 2

    The Business of Improvement ..... 3

**The Way We Work: The New Paradigm of Performance .....5**

    We Live in a New Economic Age: The Need for Improvement ..... 6

        The Ford Transformation: The New Economic Age Comes Home ..... 8

            The Transformation Continues ..... 9

        Success: It's In The Way We Work..... 9

    The Old Paradigm ..... 9

        Management by Objectives/Results..... 10

            The Myth of Ends and Means Separation ..... 12

            The Myth of Functional Independence ..... 14

            The Myth of Individual Effort..... 16

        The Effects of the Old Paradigm ..... 18

    Systems Thinking: The New Paradigm of Performance Improvement ..... 23

        Creating a New Organization Chart ..... 26

            Ends and means are linked, not separate ..... 26

            Integration, not Independence..... 28

            System performance over individual effort. .... 28

Star Quality: Principles of the New Management.....	29
1. Customer Driven .....	29
2. People Based.....	30
3. Process and System Focused.....	31
4. Scientific Method .....	32
5. Purposeful .....	32
Are You Ready? Of Termites and Top-Down .....	34

## **Improving Performance: Critical Components of Systems Thinking . 35**

Understanding Systems and Processes .....	36
The Need for Frames .....	36
Defining the System: The SIPOC Model .....	37
The Flow of Work.....	39
System Structure: The Physical Components .....	40
The Actors: Customers, Suppliers and Our Own Organization.....	40
Our Organization (Process Owner).....	42
Customers .....	45
Suppliers .....	51
Inputs and Outputs.....	55
Outputs .....	55
Unintended Outputs.....	59
Inputs .....	59

Processes .....	61
Processes consist of a set of causes and conditions that come together. ....	61
Process Function – Transforming Inputs to Outputs.....	62
The purpose of every process, and every part of every process, is adding value.....	63
Types of Processes .....	64
Quality Characteristics: The Measures of Performance .....	68
Types of Quality Characteristics .....	70
Lead - Lag Effects.....	71
Creating a Performance Model.....	72
Start at the End – What is Important to the Customer .....	73
Moving From Motherhood to Metrics.....	74
Define the Critical Quality Characteristics .....	76
Measurements, Measures and Metrics .....	78
Concluding Remarks on Quality Characteristics .....	82
Critical System Concepts: The Linkages Between Process and Improvement .....	82
Value.....	83
Value and Performance.....	84
Variation.....	90
Variation Can Be Pictured as a Distribution.....	90
Types of Variation .....	92
Different variation, different improvement approaches .....	95
Variation and Value .....	97
Complexity .....	101
The Greater the Complexity, the Greater the Waste.....	106

Variation and Complexity .....	108
Control .....	110
Chaos .....	110
Visual Control .....	111
Numerical Control .....	111
Systemic (Statistical) Control .....	112
A Typical Control System .....	114
Improving Performance .....	116
Dimensions of Improvement .....	118
Improving Efficiency .....	118
Improving Effectiveness .....	120
Improving Adaptability & Flexibility .....	123
Organizational Improvement Strategies .....	125
Refining .....	125
Redesigning .....	127
Re-Engineering .....	127
Methods & Models of Improvement .....	128
Levels of Organizational Learning .....	129
Organizational Learning Method .....	131
The PDSA (PDCA) Cycle .....	132
Organizational Learning Disabilities .....	134
Seven Step Model of Improvement .....	136
Using the Model .....	143

The Strategy .....	143
--------------------	-----

## **Getting Ready: Planning and Organizing for Performance Improvement 149**

Planning for Improvement .....	149
Recognizing The Need.....	149
Problem Recognition Processes.....	150
Performance Gap Analysis .....	151
Creating Commitment.....	156
Talk About It – Share What is Known.....	156
Define the Problem.....	157
Paint a Picture, Establish a Vision .....	158
A Real World Example .....	158
The Project .....	159
No Trivial Projects, Only Differences in Scale and Scope.....	160
Improvement Project Fundamentals .....	160
Organizing for Improvement .....	163
Why Use Teams? .....	163
Building Commitment.....	164
Effective Framing.....	164
Barrier Busting .....	165
Knowledge Generation & Sharing .....	165

Types of Teams .....	166
Executive or Leadership Team .....	166
Corporate Task Force.....	169
Cross Functional Improvement Teams .....	170
Intact Teams .....	172
Planning & Organizing .....	174
Assigned Tasks .....	175
Selecting Team Members.....	175
Team Responsibilities & Duties .....	176
Project Team Charter or Mandate .....	177
What Does it Look Like?.....	177
Creating a Charter .....	177
Helpful Hints.....	182
System Definition Diagram .....	183
Using the System Definition Diagram .....	187
Team Norms: Operating Guidelines .....	187

Example of a set of team norms.....	188
Creating team norms.....	188

**Creating Visual Models: Using the Tools of Depiction .....191**

Two Types of Pictures.....	192
System & Process Maps .....	193
Why use system & process maps?.....	193
Sources of Process Maps.....	194
Types of Process Maps.....	195
Critical Processes/System Mapping .....	196
A Different Kind of Process Map.....	198
Characteristics of a Good Critical Process Map.....	199
Creating the Critical Process Map.....	200
Example: Describing Chevron Canada .....	204
Block Diagrams .....	207
Constructing Block Diagrams.....	207
Block Boundary Diagram.....	208
Block Flow Diagram.....	209
Creating the Block Diagram.....	210
Characteristics of a Good Block Diagram.....	212
Flowcharts .....	214

The Flowchart Symbol Set .....	215
Types of Flowcharts.....	216
1. Basic Flow Chart.....	216
2. Hierarchical Flowcharts .....	217
3. Functional or Deployment Flowcharts .....	218
4. Annotated Flowcharts .....	222
Constructing Flowcharts .....	223
Data Gathering: Some Helpful Notes on Interviewing.....	225
Basic Flowchart Analysis .....	228
Voice of the Process Tables .....	234
VOPT Part 1: Descriptive Analysis.....	238
VOPT Part 2: Preliminary Performance Analysis .....	238
Inputs.....	239
Outputs .....	239
Reliability (Effectiveness) Analysis.....	240
Cycle Time (Efficiency) Analysis .....	240
Using VOPT to Support Flowchart Analysis .....	242
From “As Is” to “To Be” .....	246
Cause & Effect (Ishikawa) Diagrams .....	248
What It Looks Like.....	248
Where to Use.....	249
How to Make an Ishikawa Diagram.....	250
Helpful Hints.....	254

Example: Examining Service Delivery Problems .....	255
Supporting Analytical Methods .....	259
Classifying Frequency of Occurrence .....	259
Is/Is Not (Variance) Analysis .....	260
CEDAC/SEDAC .....	266
Summary: Using Visual Models .....	271

## **Performance Measurement: The Basics of Gathering and Describing Numerical Data 273**

The Science of Data .....	274
Four Things You Can Do With Data.....	275
Gathering Data .....	276
The Measurement Process.....	277
No True Values of Anything.....	278
Operational Definitions .....	280
What Does “On Time” Mean?.....	281
Operationalizing the Measurements.....	281
Measurement Quality: Three questions to ask any measurement system. ....	282
1. Is the measurement system accurate? .....	282
2. Is the measurement system precise? .....	283
3. Is the Measurement System valid? .....	283

Impact of Measurement Systems on People .....	284
Critical Data Gathering Considerations.....	285
Purpose of the Analysis.....	286
Stratification .....	290
Sampling .....	293
The Process of Gathering Data .....	302
Data Gathering Tools .....	313
Data/Indicators Documentation Template.....	313
Check Sheets.....	315
Types of Check Sheets .....	316
Other Data Gathering Tools .....	320
Organizing and Summarizing Data .....	320
Types of Data .....	321
1. Measured (Continuous or Variables Data) .....	321
2. Counted (Attribute or Discrete Data).....	321
3. Compound Data.....	322
Implications.....	323
Scales in Measurement .....	324
Organizing the Data .....	326
Sorting Things Out.....	326
Grouping the Data.....	327
Summarizing the Data: Calculating Some Statistics.....	329
Central Tendency: Finding the Middle .....	329
Sample Calculations of Average.....	330

Dispersion .....	334
Sample Calculations of Dispersion .....	336
Shape.....	340
Comparing the Data: Making It Meaningful .....	342
Expectations.....	343
Other Data/Empirical .....	343
Limitations of Summary Statistics .....	344
The Three Laws of Performance Measurement .....	344
Law #1: Half of everything is below average .....	345
Law #2: Performance measurement has two dimensions .....	346
Law #3: To understand the data, you must use the tools designed for that purpose.....	347

## **Analyzing Results: Tools for the Analysis of System Performance and Capability 353**

Run and Control Charts.....	354
Histograms.....	354
Run Charts .....	356
Advantages of run charts.....	357
Applications of Run Charts.....	358
Creating the run chart .....	359
Run Chart Analysis.....	360
1. Analyzing Run Length .....	361
2. Number of Runs.....	362

3. Run Chart Patterns .....	363
Testing the significance of run chart patterns.....	367
Run Chart Example 1: Children Under Protection.....	368
Run Chart Example 2: Analyzing Sales Levels.....	369
Control Charts .....	371
Description .....	371
Advantages and Uses of Control Charts .....	372
Fundamental Control Chart Concepts .....	374
1. Control Limits.....	374
2. Rational Sub-groups.....	377
Control Chart Interpretation.....	380
1. The Control Limit Rule .....	381
2. Run Rules .....	382
3. Zone Rules .....	383
Important Considerations When Interpreting Zoned Control Charts .....	385
A Consistent Interpretation Strategy .....	386
Control Charts and Performance Maturity .....	386
Types of control charts .....	387
Variables (Measured) Data Control Charts.....	387
Attribute (Counted) Data.....	389
Summary: Basic Types of Control Charts.....	393
Constructing Variables (Measured) Control Charts .....	393
Issues with Measured Control Charts .....	394
Normality of Data.....	394

Auto correlation .....	395
Basic Formulas and Constants .....	395
The XmR Chart .....	396
Construction Steps .....	396
Example 1: Monthly Sales Levels.....	401
Example 2: Community Crime Rate.....	404
Example 3: Inventory Levels.....	406
The X-Bar, R Chart .....	409
Guidelines to Usage.....	409
Construction Steps .....	410
Example of Construction Steps: Service Turnaround Time .....	414
The X-bar, S Chart.....	417
Applications.....	417
Constructing Attribute Control Charts .....	418
Sample Size: To analyze count data, you must find something to count .....	418
Operational Definitions: When is a blemish a blemish .....	419
Distributional Assumptions: The data must be the right type of data .....	420
Basic Formulas.....	421
Counting the Number Defective – the NP-chart .....	423
Construction .....	423
Example of np-chart: Customer Satisfaction .....	426
Analyzing proportions: The P-chart .....	428
Construction .....	428
Example of p-chart: On Time Delivery Record .....	432

Example of p-chart: Employee Absenteeism .....	435
Counting Occurrences: The C-chart.....	437
Construction .....	438
Example of c-chart: Pump Failures .....	440
Rates of Occurrence: The U-chart.....	442
Construction .....	443
Example of u-chart: Benchmarking Comparative Accident Rates .....	446
Example of u-chart: Crime Rate.....	449
Histograms: The Performance Profile .....	451
Description .....	452
Where to Use Histograms.....	453
Limitations of Histograms .....	454
Creating a Histogram.....	455
Some Basic Rules to Preparation .....	457
Histogram Analysis and Interpretation .....	457
Qualitative Analysis.....	458
Quantitative Analysis.....	463
Histogram Example 1: Time to Answer for Emergency Response .....	464
Histogram Example 2: Days Required to File Regulatory Compliance Documents .....	467
Histogram Example 3: Per Capita Debt .....	469
Histogram Example #4: Survey Results .....	473
Capability: Can We Meet Expectations? .....	475
Capable and Incapable Processes. ....	475
Picturing Capability .....	475

Three Capability Conditions .....	476
Determining Capability .....	479
Determining Capability Example: Response Time .....	480
Quantifying Capability .....	483
Four Approaches .....	484
Determining Sigma for Capability: Finding the Natural Process Limits .....	486
1. Sigma Analysis .....	491
2. Capability Index .....	494
3. Fraction Non-Conforming Analysis .....	500
4. The Taguchi Approach .....	504
Summary of Capability .....	508
No Control (Chart) No Capability .....	508
Two Dimensions to Performance .....	508
Two Voices Need To Be Heard .....	509

## **Analyzing Relationships: Tools for the Analysis of Cause and Effect 511**

The Search for Performance Drivers .....	511
The Tools .....	513
Common Approach to Analysis .....	515
Pareto Charts .....	515
Description .....	516
Two Types of Categories .....	517

Using the Pareto .....	518
Preparing Pareto Diagrams .....	519
Using and Interpreting Pareto Charts .....	520
Pareto Example 1: Root Cause of Worker Injuries .....	522
Drilling Down for Root Causes .....	524
Pareto Example 2: Analyzing Customer Complaints.....	525
Open-Ended Responses .....	528
Box & Whisker Plots .....	528
Description .....	528
When to Use the Box And Whisker Plot .....	530
Box & Whisker Interpretation .....	531
How to Construct a Box and Whisker Plot.....	533
Box & Whisker Example 1: Emergency Response Times .....	536
Box And Whisker Example 2: Levels of Contaminant.....	538
The Dot Plot.....	540
Learning to Love the Dot Plot .....	541
Scatter Diagrams .....	543
Where to Use .....	544
Constructing the Scatter Diagram.....	546
Sampling Concerns.....	547
Steps in Constructing a Scatter Diagram .....	548
Interpreting Scatter Diagrams.....	550
Correlation Not Causation .....	550

What Correlation Looks Like – Scatter Diagram Patterns .....	551
Strength of Correlation .....	553
Example: Steel Hardener and the Hardness of Steel.....	556
Potential Problems of Interpretation .....	558
Summary .....	561
Performing Experiments .....	562
Types of Experiments .....	562
Designing the Experiment .....	563
Basic Analytic Approach .....	565
Example: A Single Factor Experiment .....	567
Design Matrix .....	567
Running the Experiment.....	568
Analyzing the Data .....	569
Analysis of Data Arising From Experiments .....	575
A Note on Analysis of Variance (ANOVA).....	576
Summary: Analyzing Relationships .....	578

## **Generating and Analyzing Qualitative Data .....581**

What are we trying to do? .....	581
The Tools.....	583
Brainstorming .....	585

When to Use Brainstorming .....	585
Guidelines to Brainstorming .....	585
General Sequence of Events .....	587
Variations to Enhance Creativity And “Bust” Barriers.....	588
Now What? .....	589
Multi-voting .....	589
Uses of Multi-voting .....	589
General Sequence of Events.....	590
Mind Mapping .....	593
Uses of Mind Mapping.....	594
General Sequence of Events .....	594
Example: Helping People Living With HIV/AIDS .....	596
Nominal Group Technique .....	601
Uses of the Nominal Group Technique .....	601
General Sequence of Events .....	601
Summary of NGT .....	604
Crawford Slip Method (CSM) .....	604
Uses of CSM.....	604
General Sequence of Events .....	605
Some Helpful Hints .....	608
Affinity Diagrams .....	609

Uses of Affinity Diagrams.....	609
Preparing Affinity Diagrams .....	610
Parallel Processing Affinity.....	613
Example: Affinity Charting Shipping Problems.....	613
Tree Diagrams .....	614
Applications.....	616
Preparing Tree Diagrams: The General Sequence of Events.....	617
Example: Using a Tree Diagram to Plan Improvement.....	620
Using the Tree Diagram to Drive Brainstorming .....	623
Summary: Working With Qualitative Data .....	624

## **Making Decisions: Tools for the Evaluation of Alternatives .....627**

Decision Methods .....	628
Autocratic .....	628
Democratic .....	628
Consensus.....	628
Unanimous .....	630
Comparative Decision Methods .....	630
Types of Decision Tools & Techniques .....	630
Preference Decision Tools .....	631
Voting Methods .....	634
When to Use Voting Methods .....	634

Basic Procedure.....	634
Example: Identifying Causes of Shipping Errors .....	636
Multi-voting.....	638
Example of Multi-voting.....	639
Simple Rating .....	640
When to use Rating Methods.....	640
Basic Procedure.....	641
Example: Shipping Department Problems .....	643
Simple Ranking .....	644
Where to Use .....	645
Basic Ranking Procedure .....	646
Example: Ranking Potential Areas of Shipping Problems .....	648
Evaluative Tools and Techniques .....	650
Pugh Concept Selection Matrix.....	652
Basic Description.....	653
Where to use the Pugh Matrix .....	653
Creating the Matrix .....	656
Analytical (Data) Matrix.....	661
Where to Use the Analytical Matrix .....	662
Creating the Analytical Matrix.....	664
The Effort/Impact Matrix .....	668
Importance/Performance Matrix.....	669
Effectiveness/Efficiency Matrix .....	671
Issues Analysis Matrix.....	673

Criteria Rating Technique .....	675
When Should The Criteria Rating Technique Be Used? .....	676
Creating the Criteria rating Matrix .....	677
Summary Comments on the Criteria Rating Technique.....	684
Analytical Hierarchy Process (AHP) .....	685
Where to Use AHP. ....	685
General Sequence of Events .....	687
Special Situations .....	699
Summary: Using Decision Tools .....	705

## **Management & Planning Tools: From Intention to Implementation 707**

Force Field Analysis .....	709
What the Force Field Diagram Looks Like .....	710
When to Use .....	711
Procedure .....	711
Interpretation & Change Strategy.....	713
Example: Analysis of Sole- Source Supplier .....	715
Responsibility Charting .....	717
Where to Use the Responsibility Chart.....	718
Creating the Responsibility Chart .....	719
Example: Improvement Team Responsibilities.....	723

Example: Sole-Source Supplier Relationships.....	723
GANTT Charting .....	726
Where to Use .....	727
Procedure for creating the GANTT Chart.....	727
Useful Tricks and Enhancements .....	731
PERT: Estimating Time (or Just About Anything Else) .....	733
When to Use PERT .....	734
Making a PERT Estimate .....	735
The Basic Formulas.....	735
What are the chances? .....	737
Applying PERT to multiple tasks .....	738
Example: Using PERT to estimate Revenues.....	739
Summary: Using PERT .....	741
Relationship Diagram .....	742
What Does it Look Like?.....	743
When to Use an Relationship Diagram.....	744
Procedure.....	745
Weighting Relationships .....	749
Example: Social System Analysis.....	750
Matrix Diagrams .....	755
Where to Use Matrix Diagrams .....	755
Types of Matrices .....	756
L-type Matrix .....	757

T-Type Matrix.....	757
Y-Type Matrix .....	758
X-type Matrix .....	758
C-type Matrix .....	759
Creating the Matrix Diagram .....	760
Example: Analyzing the Requirements of Different Customer Segments .....	765
Example: Analyzing Performance Problems .....	767
Summary: Management & Planning Tools .....	768

## **Organizational Alignment: The Tools and Techniques of Deployment 771**

Two Dimensions of Alignment .....	771
The Deployment Chart .....	773
Advantages of Deployment Charts .....	774
What Does The Chart Look Like? .....	776
Creating a Basic Deployment Chart.....	778
Policy Deployment: creating Vertical alignment .....	794
Where to Use the Policy Deployment Chart.....	794
Example: Improving Bank Performance.....	796
Quality Function Deployment: Creating Horizontal Alignment .....	803

Where to Use QFD .....	803
Example: Redesigning the Service and Repair Function .....	805
Helpful Supporting Tools .....	812
Voice of the Customer Tables .....	812
A Typical Voice of the Customer Process .....	813
Voice of the Customer Tables .....	814
Pareto Charts .....	818
Analytical Matrices .....	819
Run Charts .....	821
Creating an Alignment System .....	822
Four Phase Model .....	823
Akao's Planning System: The Matrix of Matrices Approach .....	824
Summary: Creating Alignment With Deployment Tools .....	826

## **Building Systems of Improvement: Key Considerations for Performance-Based Organizations ..... 827**

Building a Performance Improvement Culture .....	827
The Pursuit of Knowledge.....	828
Characteristics of a Performance Culture .....	829
1. Problems are Pursued .....	829
2. Experiment and Empiricism Rule .....	830

3. No Fear of Failure .....	831
4. Information and Ideas Flow .....	832
5. Improvements Are Standardized.....	833
6. There is a system of knowledge generation and improvement .....	834
The Components of Improvement .....	836
Purposeful .....	837
Customer Driven .....	838
Process Focused.....	838
Scientific Method.....	840
People Based .....	841
Accelerated Cycle Learning .....	842
The Pace of Improvement .....	842
Accelerating Improvement .....	843
How Fast? .....	846
Performance: It's About Know How .....	846
